Dear Jaco,

I would just like to inform you that we are extremely satisfied with the outcome of various tests done with the "Nano Products" you have supplied us.

Most impressive was the Nano treatment of an electrical turbine that was exposed to moisture. The bearing, rotor and stator seemed beyond the point of rescue but after the unit was sprayed in entirety and run for a few minutes everything was running fine!

Myself and the technician will definitely recommend the Nano products to be a must have in any workshop.

Thank you very much.

Sincerely,

Neil Labuschagne
